

CSU Online Information Security Training

The CSU offers several online courses to meet University requirements for training. This training is provided by SkillSoft and hosted and managed in the SkillPort catalog and portal. There is one link to access the SkillPort training for all SDSU employees and auxiliaries:

<https://ds.calstate.edu/?svc=skillsoft&org=sdsu>

Note: Bookmark this website for future use.

This same URL link is used for accessing other online CSU courses, such as Sexual Harassment, and Defensive Driving. After clicking on the link, employees need to login with their Shibboleth credentials to access their individual training profile and assigned courses.

The three online CSU courses offered for Information Security Training are listed below. Next to each course is the contact information for the SDSU administrator of each course to request enrollment in the course or to answer questions about the course.

EDU: FERPA & Protecting Education	Rayanne Williams, Enrollment Services, william7@mail.sdsu.edu, x41686
HIPAA Basics	Susan Henry, Student Health Services, shenry@mail.sdsu.edu, x47359
SDSU Security Awareness	Felecia Vlahos, IT Security Office, iso@sdsu.edu, x44049
